

ABSTRACT OF THE DISCLOSURE

The present invention comprises: a strip-shaped peel sheet; a spacer sheet stuck onto the peel sheet via an adhesive layer; an upper face sheet stuck onto an upper face of the spacer sheet via an adhesive layer; and contact plates stuck to the upper face sheet, wherein, on the peel sheet and the spacer sheet, penetration holes through which the contact plates can penetrate, and coupling grooves by which adjacent penetration holes are coupled are formed, wherein, of the coupling grooves, one side of the coupling groove provided in a direction crossing a feed direction of the strip-shaped peel sheet continues to rear ends of inner circumferences of the adjacent penetration holes with respect to the feed direction of the peel sheet.
